CONTENTS

Volume 32, Issue Nos. 1–8 (2000)

International Journal for
NUMERICAL METHODS IN FLUIDS

Issue No. 1, 15 January

Iterative solution of panel method discretizations for potential flow problems. The modal multipolar preconditioning: J. D'Elia, M. Storti and S. Idelsohn 1

Vortex particle-in-cell method for three-dimensional viscous unbounded flow computations: Chung-Ho Liu and D. J. Doorly 29

A new finite element formulation for both compressible and nearly incompressible fluid dynamics: P. A. B. de Sampaio and M. L. Moreira 51

A boundary element method and spectral analysis model for small-amplitude viscous fluid sloshing in couple with structural vibrations: Yuelong Zang, Songtao Xue and Satoshi Kurita 79

Numerical investigation of the aerodynamics of the near-slot film cooling: P. G. Kassimatis, G. C. Bergeles, T. V. Jones and J. W. Chew 97

Computational aspects of the spectral-Galerkin FEM for the Orr-Sommerfeld equation: N. P. Kirchner 119

ANNOUNCEMENT 139

Issue No. 2, 30 January

Schwarz domain decomposition for the incompressible Navier–Stokes equations in general co-ordinates: E. Brakkee, P. Wesseling and C. G. M. Kassels 141

$O(2)$-symmetry breaking bifurcation: with application to the flow past a sphere in a pipe: K. A. Cliffe, A. Spence and S. J. Tavener 175

An adaptive front tracking technique for three-dimensional transient flows: O. S. Galaktionov, P. D. Anderson, G. W. M. Peters and F. N. van de Vosse 201

A numerical method for simulating discontinuous shallow flow over an infiltrating surface: F. R. Fiedler and J. A. Ramirez 219

One-dimensional finite element grids based on a localized truncation error analysis: S. C. Hagen, J. J. Westerink and R. L. Kolar 241

Indexed or abstracted by 'Applied Mechanics Reviews', 'BHRA Fluid Engineering Centre', 'Cambridge Scientific Abstracts', 'Chemical Abstracts Service', 'Compumath Citation Index Institute for Scientific Information (ISI)', 'Current Contents (CC)/Eng, Tech & Applied Sciences', 'Ei COMPENDEX PLUS', 'Ei Page One', 'Engineering Index', 'Eng. Societies Library', 'Fluidex (Elsevier)', 'Geobase (Elsevier)', 'Geographical Abstracts: Physical Geography', 'Geological Abstracts', 'INSPEC', 'international Aerospace Abstracts & Database (AIAA)', 'Mathematical Reviews', 'Mechanics', Research Alert (ISI)', 'SCISEARCH Database (ISI)', and 'Zentralblatt für Mathematik'.

Issue No. 3, 15 February

Simulation of non-hydrostatic, density-stratified flow in irregular domains: K. B. Winters, H. E. Seim and T. D. Finnigan 263

A grid deformation technique for unsteady flow computations: L. Dubuc, F. Cantariti, M. Woodgate, B. Gribben, K. J. Badcock and B. E. Richards 285

Flows through plane sudden-expansions: S. R. N. De Zilwa, L. Khezzar and J. H. Whitelaw 313

An unstructured grid, three-dimensional model based on the shallow water equations: V. Casulli and R. A. Walters 331

Colocated schemes for the incompressible Navier–Stokes equations on non-smooth grids for two-dimensional problems: C. Moulinec and P. Wesseling 349

CONFERENCE DIARY 365

Issue No. 4, 29 February

Large eddy simulation of subsonic and supersonic channel flow at moderate Reynolds number: E. Lenormand, P. Sagaut and L. Ta Phuoc 369

Simulation of transients in natural gas pipelines using hybrid TVD schemes: Junyang Zhou and M. A. Adewumi 407

Finite element modified method of characteristics for the Navier–Stokes equations: A. Allievi and R. Bermejo 439

A numerical method for the evaluation of hydrodynamic forces of translating bodies under a free surface: S. A. Yang 465

Issue No. 5, 15 March

Low-Reynolds number $k-\tilde{\varepsilon}$ modelling of flows with transpiration: C. B. Hwang and C.-A. Lin 495

A Particle-in-cell method for the solution of two-layer shallow-water equations: B. Cushman-Roisin, O. E. Esenkov and B. J. Mathias 515

Numerical study of vortex shedding from a rotating cylinder immersed in a uniform flow field: Mo-Hong Chou 545

Semi-structured meshes for axial turbomachinery blades: L. Sbardella, A. I. Sayma and M. Imregun 569

Simulation of unsteady turbulent flows around moving aerofoils using the pseudo-time method: K. J. Badcock, F. Cantariti, I. Hawkins, M. Woodgate, L. Dubuc and B. E. Richards 585

An algebraic boundary orthogonalization procedure for structured grids: Reijo Lehtimäki 605

Issue No. 6, 30 March

Analysis of iterative methods for the viscous/inviscid coupled problem via a spectral element approximation: Chuanju Xu and Yumin Lin 619

Considerations on the spring analogy: F. J. Blom 647

Analysis of high speed non-equilibrium chemically reacting gas flows. Part I: Physical modeling and sensitivity studies: C. Harlé, G. F. Carey and P. L. Varghese 669

Analysis of high speed non-equilibrium chemically reacting gas flows. Part II: A finite volume/finite element model and numerical studies: C. Harlé, G. F. Carey and P. L. Varghese 691

Numerical prediction of flow in a model of a (potential) soft acting peristaltic blood pump: S. Natarajan and R. Mokhtarzadeh-Dehghan 711

Anisotropic mesh adaption: towards user-independent, mesh-independent and solver-independent CFD. Part I: General principles: Wagdi G. Habashi, Julien Dompierre, Yves Bourgault, Djaffar Ait-Ali-Yahia, Michel Fortin and Marie-Gabrielle Vallet 725

Issue No. 7, 15 April

Numerical studies on non-linear free surface flow using generalized Schwarz–Christoffel transformation: J. M. Chuang 745

A spectral solution of the magneto-convection equations in spherical geometry: R. Hollerbach 773

Upwinded finite difference schemes for dense snow avalanche modeling: G. Sartoris and P. Bartelt 799

A posteriori bounds for linear functional outputs of Crouzeix–Raviart finite element discretizations of the incompressible Stokes problem: M. Paraschivoiu and A. T. Patera 823

Contact angle calculations from the contact/maximum diameter of sessile drops: J. Graham-Eagle and S. Pennell 851

A numerical investigation of flows of shear-thinning fluids with applications to blood rheology: J. Hron, J. Málek and S. Turek 863

On a higher-order bounded discretization scheme: B. Song, G. R. Liu, K. Y. Lam and R. S. Amano 881

CONFERENCE DIARY 899

Issue No. 8, 30 April

The implementation of an aeronautical CFD flow code onto distributed memory parallel systems: C. S. Ierotheou, C. R. Forsey and M. Leatham 903

Numerical methods for conjunctive two-dimensional surface and three-dimensional sub-surface flows: M. Morita and B. C. Yen 921

An improved second moment method for solution of pure advection problems: A. Ghods, F. Sobouti and J. Arkani-Hamed 959

The energetic implications of the time discretization in implementations of the A.L.E. equations: S. J. Childs 979

Numerical modelling and validation of Marangoni and surface tension phenomena using the finite volume method: D. Wheeler, C. Bailey and M. Cross 1021
